PROFESSIONAL PROFILE

A student of the digital garden walks the path of Cybersecurity and Digital Forensics, having touched the soil of penetration testing, digital forensics, OSINT, vulnerability assessment, and incident response through the seasons of internships, research, open-source leadership, and security-focused projects. Like a craftsman shaping clay, practical tools were built in image forensics, blockchain-based evidence management, cybersecurity training, and AI-assisted analytics, with a steady hand in Python, Bash, JavaScript, SQL, Autopsy, Volatility, Burp Suite, Nmap, Wireshark, and related security workflows. The river flows whether one watches it or not, yet the master sees the current in every packet.

CORE COMPETENCIES

- Digital forensics, evidence acquisition, image forensics, memory and disk analysis, chain of custody, and forensic documentation.
- Penetration testing, vulnerability assessment, web application security, OWASP Top 10, MITRE ATT&CK, and Cyber Kill Chain.
- OSINT investigations, incident response support, log analysis, threat intelligence, and security event analysis.
- Security reporting, risk assessment, network security, and SOC operations.
- Python, Bash, JavaScript, SQL, PowerShell, Linux, Windows, Docker, and virtualization.

SKILLS

- **Programming:** Python, JavaScript, SQL, Bash, PowerShell, C/C++.
- **Web Development:** React, Node.js, Express, HTML, CSS, REST APIs.
- **Cybersecurity:** Penetration Testing, Vulnerability Assessment, Web Application Security, Network Security, Threat Intelligence, Incident Response.
- **Digital Forensics:** Evidence Acquisition, Memory Analysis, Disk Analysis, Image Forensics, Chain of Custody, Artifact Analysis, Forensic Reporting.
- **Tools:** Burp Suite, Nmap, Wireshark, Metasploit, Autopsy, Volatility, Maltego, Splunk.
- **Platforms:** Linux, Windows, Docker, VirtualBox, VMware.
- **Research / OSINT:** OSINT Investigations, Log Analysis, Security Event Analysis, Documentation, Technical Writing.

EDUCATION

🎓 **Sandip University, Nashik**

B.Tech in Cybersecurity and Digital Forensics

Expected Graduation: 2027

🎓 **St. Joseph's Junior College, Kurnool**

Intermediate (MPC), completed in 2023.

🎓 **Sri Lakshmi High School, Kurnool**

SSC, completed in 2021.

EXPERIENCE

9. Research Intern — International Institute of SDG's and Public Policy Research – Internship

May 2026 - Present

- Research Internship at the International Institute of SDGs and Public Policy Research. Excited to gain hands-on experience in research, learn from experts, and contribute meaningfully during this internship.

8. Naksh Foundation — Research Content Intern, Project Cyber Shield

Feb 2026 - Present

- Conduct cybersecurity research and awareness content development centered on threat intelligence, attack patterns, and security education.

7. Edunet Foundation / VOIS (Vodafone Idea Foundation) — Cybersecurity Intern

Mar 2026 - Apr 2026

- Completed project-based cybersecurity training focused on threat mitigation, vulnerability management, and infrastructure security in enterprise-style environments.

6. The Linux Foundation — Student Intern
Feb 2026 - Present

- Completed advanced learning modules focused on Linux security, system hardening, and professional security practices.

5. Cyber War Lab — Cybersecurity Intern
Dec 2025 - Jan 2026

- Performed penetration testing and vulnerability assessment using tools such as Nmap, Gobuster, Hydra, and lab-based targets including DVWA in Docker environments.
- Applied OWASP Top 10, MITRE ATT&CK, and Cyber Kill Chain frameworks for threat modeling, attack-path analysis, and structured reporting.
- Completed CTF-style exploitation workflows and documented findings in professional security reports.

4. Cyber Privilege — Cyber Forensics Specialist Intern
Aug 2025 - Jan 2026

- Supported digital forensic investigations, evidence analysis, OSINT collection, incident response tasks, and breach-analysis workflows under supervision.

3. Shadow Fox — Cybersecurity & Digital Forensics Intern
Jun 2025 - Jul 2025

- Completed task-based cybersecurity and digital forensics training with hands-on practice in forensic analysis and evidence preservation.

2. Participant — Asia Youth International MUN - Apprenticeship
Mar 2024

- Participated in the Asia Youth International Model United Nations, gaining a deeper understanding of global issues and developing essential skills in diplomacy and negotiation through engagement with a diverse international community of youth leaders.

1. SUN Cybersecurity Club, Sandip University — Secretary & Technical Lead
Aug 2023 - Aug 2025

- Organized cybersecurity workshops and CTF competitions, mentored peers, and supported security awareness activities across campus.

SELECTED PROJECTS

NETWORK PORT SCANNER-DGC
Lead Developer

- Professional Network Security Assessment Tool
- Advanced penetration testing & security assessment with CVE detection, SSL analysis & service enumeration

LOOK-DGC — Digital Image Forensics Toolkit
Lead Developer

- Built a Python and OpenCV-based toolkit for metadata extraction, EXIF review, tampering detection, copy-move forgery analysis, JPEG ghost detection, and automated forensic workflows.
- Designed the toolkit to support professional digital image investigations and reduce manual analysis effort through automation.

EVID-DGC — Blockchain Evidence Management System
Lead Developer

- Developed a blockchain-enabled evidence management platform using React, Node.js, IPFS, and smart-contract concepts for tamper-resistant storage and chain-of-custody tracking.
- Built the platform around auditability, integrity, and secure record preservation for digital forensics use cases.

Security-Pass-DGC — Cybersecurity Training Simulator
Lead Developer

- Created a browser-based training platform covering phishing awareness, password security, attack scenarios, and safe-response practices through interactive simulation.

AgriPredict / KisanSafe — AI Crop Forecasting Platform
Lead Developer

- Built an AI-powered crop-yield forecasting platform with real-time agricultural data integration and recommendation-oriented workflows for farmers.
- Developed the project as a hackathon/university innovation build using machine learning and public-sector data inputs.

Portfolio Cybersecurity - Gopichand Dandimeni

- Professional cybersecurity and digital forensics portfolio
- Personalized entry with visitor tracking

OPEN-SOURCE & LEADERSHIP

- Mentored of projects in GirlScript Summer of Code 2026.
- Mentored 5 projects in GirlScript Summer of Code 2025.
- Mentored 3 projects in Social Winter of Code 2026.
- Contributed to multiple projects in Elite Coders Winter of Code 2026 and maintained active cybersecurity and development repositories on GitHub.

CERTIFICATIONS

- A Beginner's Guide to Linux Kernel Development (LFD103), The Linux Foundation, February 2026.
- Cybersecurity Essentials (LFC108), The Linux Foundation, January 2026.
- Reporting Strategies and Best Practices, Qualys Certified Specialist, January 2026.
- Windows Forensic Analysis Bootcamp, CDAC, October 2025.
- TCS ION Career Edge – Young Professional, February 2026.
- TATA Cybersecurity Analyst Job Simulation by Forage, March 2025.
- Postman API Fundamentals Student Expert, June 2025.
- Introduction to Critical Infrastructure Protection, OPSWAT Academy, September 2024.

TOOLS & TECHNOLOGIES

Autopsy, FTK Imager, Volatility, Burp Suite, Nmap, Wireshark, Metasploit, Maltego, Nikto, Gobuster, FFUF, WPScan, Splunk, Docker, VirtualBox, VMware, Kali Linux, Ubuntu, Windows, Python, Bash, JavaScript, SQL, PowerShell.

ADDITIONAL INFORMATION

- Languages: English, Hindi, Telugu.
- Current location: Nashik, Maharashtra, India.
- Date of birth: 03 March 2005.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
